**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8 and 23-25, drawn to a system and method for searching a data set using a query distributor for the lowest air fare and schedule based on user criteria, classified in class 707, subclass 3
  - II. Claims 9-15 and 16-22, drawn to a system and method for loading updated airline schedules and fares into a search engine to process travel requests and present flight data, classified in class 705, subclass 6

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as querying for the lowest airline schedule and fare based on user criteria. Invention II has separate utility such as loading updated airline schedules and fares into a search engine so that the lowest airfare can be returned to the user. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
